

*- a partnership to conserve wildlife and hunting heritage -*

*The undersigned recognize that sportsmen and -women have been at the forefront of natural resource conservation throughout North America for over a century, and hunters have successfully met numerous conservation challenges in the past. The ability of the sporting community to voluntarily prevent wildlife lead poisoning from ammunition continues that tradition; provides an additional, high-visibility opportunity to demonstrate our commitment to the conservation of America's wildlife; and a mechanism to minimize unintentional impacts on wildlife health while protecting the public image of hunting and the associated benefits to the conservation of wildlife and habitat;*

**Whereas**, legal, regulated hunting has been and remains the foundation of the highly successful North American Model of Wildlife Conservation; and

**Whereas**, effective ecosystem management requires engaged and passionate advocates for wildlife and habitat, including both hunters and other conservation-minded citizens; and

**Whereas**, there is credible and substantial scientific evidence showing that lead ammunition can cause unintended impacts on our wildlife resources; and

**Whereas**, we believe expansion of current proactive conservation efforts by hunters will help conserve wildlife and continue to maintain public support of legal hunting; and

**Whereas**, continued research and current efforts indicate that hunters have a very high willingness to take action if asked by a credible peer or group within the sporting community;

**Therefore**, we declare that it is our goal to work collaboratively to minimize the unintended impacts of lead ammunition on wildlife and support the continued contributions of legal hunting to wildlife conservation by:

- Design and promote voluntary measures to increase the use of non-lead ammunition
- Supporting the continued long-term viability of scientifically managed hunting and the associated conservation culture by providing programs that encourage sports-men and -women participation in conservation actions
- Supporting continued efforts to conduct scientific research into the relative risk associated with specific lead exposure pathways between use of lead ammunition and wildlife
- Use scientific evaluation to assess and improve programs

The partners hereto represent support of this resolution as of the last written date below.

Rick Watson, President and CEO  
The Peregrine Fund

Date 3/26/2018

Don Moore, Director  
The Oregon Zoo

Date 4/2018

David Gercelon, President  
Institute for Wildlife Studies

Date 3/22/18

Curt Melcher, Director  
Oregon Department of Fish and Wildlife

Date 4/9/18

Ty Gray, Director  
Arizona Game and Fish Department

Date 3/15/17

Mike Fowlks, Director  
Utah Division of Natural Resources

Date 2-28-18

The groups hereto endorse the formation and intent of this partnership as defined by this resolution.
