Summary Sheet

Meeting dates:	October 18-19, 2019 Briefing and Public Hearing
Agenda item:	Sturgeon Sport Rules Update Briefing, Public Hearing
Presenter(s):	Laura Heironimus, R5 Sturgeon, Smelt, Lamprey Unit Lead, Fish Program William Tweit, Special Assistant, Fish Program

Background summary:

In an effort to simplify sturgeon sport rules and improve conservation efforts for sturgeon in Washington, a number of regulation updates are proposed, including:

1. Update Columbia River sturgeon spawning sanctuaries to include an expansion in time for all sanctuaries upstream of Bonneville to remain closed through August 31st, and to include an expansion in area for the sanctuary in John Day Reservoir (below McNary Dam) and in the Hanford Reach (below Priest Rapids Dam). The purpose of these proposed rules are to minimize handling stress of mature female sturgeon during the post-spawn period, with the intended benefits of decreasing mortality rates of oversize sturgeon and increasing spawning success.
 2. Shifting retention fisheries upstream of McNary Dam to catch-and-release only as a precautionary measure to conserve sturgeon populations due to a lack of recent monitoring data.
 3. Closing night fishing for sturgeon in the Chehalis River to comply with statewide simplification rules.
 4. Improving clarify on sturgeon catch-and-release regulations to further define what fish must be released in all areas, regardless of whether a slot-limit is in effect.
 5. Defining oversize sturgeon as fish larger than 55 inches fork length to align with rules pertaining to take of an illegal-sized sturgeon in RCW 77.15.370.
 6. Simplifying and clarifying statewide sturgeon regulations (WAC 220-316-010) to comply with agency standards and improve readability.
