

Redband Trout Video Questions

Watch the two redband trout videos and answer the following questions. You will turn in these questions in class.

Answer the following questions

[Video one](#)

- 1) What is a redd?
- 2) What is a fisheries biologist and what do they study for a living?
- 3) What environmental features make good habitat for redband trout?
- 4) What is a riparian zone?
- 5) Describe how a female makes a redd.
- 6) Describe features of the river in this video. What did you notice about the habitat?

Video two

- 1) What is a PIT tag and why do biologists monitor fish with PIT tags?
- 2) What is population abundance?
- 3) How did the habitat in this video look different or similar to the habitat in the first video?
- 4) Describe the three life histories of rainbow trout.
- 5) What are some things you can do to help redband trout?
