Washington Department of FISH and WILDLIFE

Puget Sound Commercial Crab Stored Harvest Report

The Stored Harvest Report tool is used to track commercially caught Dungeness crab that are being stored off a vessel for more than 36 hours before delivering to an original receiver. These are commonly referred to as "hung crab". Use this tool if you are removing crab from your vessel to store in containers each day after harvest. Also, use this form when you are delivering crab to an original receiver that were already stored and reported.

Do not use this tool to report crab that are not leaving your vessel or those that will be delivered to an original receiver within 36 hours. This tool is specific to the Puget Sound State commercial crab fishery. Do not report tribal harvest.

Harvester Name*

[ ]

Are you reporting stored crab or sold crab?*

( ) I am removing crab from my vessel to store before sale.

( ) I am selling crab that were already being stored.

Vessel ID*

The vessel ID is 4-5 digit number that is printed on your commercial crab license card.
