DISCUSSION	Legislative Update			
Language tweaks in proposals from PSRFE to update statutes for the committee provided with bullets				
and there was concern. Once provided with full context, was acceptable.				
CONCLUSIONS				
Provide full language proposals for approval, not just bullets.

DISCUSSION	Meeting Meals			
With all the budget cuts go	ping on the agency, it is wise to continue have	ing a meal provided or should we		
start brown bagging?				
CONCLUSIONS				
The public comments indicated that we should continue to have a meal as long as the costs were moderate as they are appreciative of the hard work that the group does for the recreational fisheries, and many of those attending are coming in straight from their respective job site.

CONCLUSIONS	We need to find funding for this position and where we can cut in our projects.	d would like the group to provide	
There was much discussion on where the funding could come from, however, no decision was made. It is suggested that the group look at which of the projects are contributing the most to our success and drop those that are not productive, or to do a straight across the board cut within the projects. Go to managers and let them know that the group feels that a full-time coordinator will enable the committee to reach their goals, but we need their help in deciding how to accomplish a budget for this position.
