“GREEN SHEET”

Meeting: Feb 4, 2012, Commission Meeting

Agenda item 11: Sportfishing Regulations 2012-13 – (Rule Adoption)

Staff Contact: Charmane Ashbrook, Sport Rules Unit Leader, Fish Program

Presenter(s): Craig Burley, Fish Management Division Manager, Fish Program

Background:

This year agency staff provided proposals in accordance with the Governor’s Executive Order 10-06 and because of reduced staffing. Rulemaking was limited to the following criteria:

- 1) Rules addressing a critical conservation need;
- 2) Finalize permanent rule making for emergency rules; and
- 3) Significant recreational opportunities that generate revenue.

Proposals were provided in text format, describing the proposed change, the reason the change is needed, and which category (1-3 above) applies. The proposals were reviewed by department staff and narrowed to eighteen. The eighteen proposals were reviewed by the Fish Committee and department staff. Comment has been received from Recreational Advisory Groups, four public meetings, email, and mail. Written comments will be received through December 30, 2011.

Policy issues:

Establish rules for the upcoming 2012-13 sportfishing season to ensure conservation of the fish and shellfish resource and provide sustainable recreational fishing opportunities.

Public involvement process and outcome:

WDFW involved the sportfishing public in the regulation development process in three major ways.

1. The public was notified about the proposals in a public mail out (attached) via a news release, email, and the department website. Instructions were provided regarding where to send written testimony and where and when the January Commission meeting (where oral testimony will be taken) will occur. The email list has been developed over several years and includes members of the public who have participated in the process before, other regulatory agencies and tribes, WDFW advisory groups, and anyone who sent requested to be part of this process.
 2. Four public meetings were held (in Aberdeen, Olympia, Mill Creek, and Spokane) to provide the timeline and process for 2012-13 rulemaking, answer questions, and receive comment. In addition, we presented the proposals and received comment during three meetings with our sportfish advisory groups.
 3. A public hearing for the 2012-13 proposals was held at the January 6 meeting in Olympia.
-

Action requested:

Consideration for adoption of the 2012-13 Sportfishing Changes as presented by staff.

Draft motion language:

Move to adopt permanent amendments to:

WAC 220-12-090 Classification--Nonnative aquatic animal Species

WAC 220-55-220 Two pole endorsement

WAC 220-56-100 Definitions--Personal-use fishing

WAC 220-56-235 Possession limits—Bottomfish

WAC 220-56-282 Sturgeon--Areas, seasons, limits and unlawful acts

WAC 232-12-019 Classification of game fish

WAC 232-28-619 Washington food fish and game fish—Freshwater exceptions to statewide rules as presented by staff

Justification for Commission Action:

This action is justified under RCW 77.12.047.

Communications Plan:

The public and our advisory groups were notified that the package of proposed changes was available in October by an e-mail and press release that referred them to the four regional public meetings, our website, and directions on how to request a paper copy. In addition, three meetings occurred with our advisory groups.

All of the proposals, associated documents, and the timeline for public comment are on the department web site. The public hearing for these proposals occurred at the January 6 meeting in Olympia.

SPORTFISHING RULE CHANGE PROPOSALS

In 2010, the Washington Department of Fish and Wildlife (Department) implemented a two year cycle for considering changes to sportfishing rules. However, due to continued budget and staffing reductions, the Department intends to limit the scope of rules being considered this year which will take effect in May 2012. In addition, Governor Chris Gregoire issued Executive Order 10-06 in November 2010, suspending non-critical rule development and adoption through December 31, 2011. To comply with this executive order and reduce staffing the Department will not solicit sportfishing rules from the public this year and is limiting rule making to rules that meet the following criteria:

- 1) Rules addressing a critical conservation need;
- 2) Finalize permanent rule making for emergency rules; and
- 3) Significant recreational opportunities that generate revenue.

CONSERVATION CONCERNS

#1. Northern Pike Classification

Proposal: Removes northern pike from being designated as a game fish and retains the designation as a prohibited species.

Explanation: Currently, northern pike (*Esox lucius*) is listed as both a game fish and as a prohibited species. Northern pike have expanded greatly in numbers and distribution in the northeast section of Washington. Their position as an apex predator and prolific spawner creates widespread potential for negative impacts to native and other game species. The potential for their negative impacts, both environmentally and economically, cannot be overstated. Having this species classified as both a game fish and a prohibited species is at cross purposes to our goal of controlling their numbers and distribution. Further, we do not want them to inhabit new waters. Removing the northern pike's designation as a game fish better aligns with the management intent for this species and will not affect the Department's ability to manage this species and promote their harvest.

Testimony:

Many responses support this proposal. Comments for this proposal include: the abundance and expanding distribution of northern pike in the Pend Oreille system poses risks to the conservation and recovery of native species, including westslope cutthroat trout and bull trout; the effort and monetary resources toward native fish recovery are being compromised by northern pike; despite recently enjoying the opportunity to catch northern pike, this species has decimated many other systems in North America; we have seen the significant increase in pike numbers on the Pend Oreille River in tournaments and the reduction of the largemouth bass fishery. There were also suggestions for: mandatory retention; using gears that include archery and spears; allowing the use of perch, and sunfish as bait; and offers from clubs to assist in reducing the northern pike population through angling. The Kalispell Tribe testified in favor of this proposal at the January 7 Commission Public Hearing.

Many responses from people state that they adamantly oppose this rule proposal. There are requests for continuing to manage northern pike as a game fish with a size limit. Comments against this proposal include: northern pike provide the only other sport fishing in Washington's portion of the Pend Oreille River (Box Canyon Reservoir) other than bass fishing; since the advent of dams, the Pend Oreille has become a warm water river with an abundance of species that provide feeding for pike and bass; this has become a popular recreational fishery and we can't stop the influx of fish from Montana so we should learn to manage them as Montana does; it doesn't make sense that smallmouth bass isn't considered invasive since it is not native, eats trout, and reproduces quickly; historically, the Newport, Cusick, and Riverbend areas of the river were just a travel corridor for trout and this is not the habitat trout prefer.

Staff Recommendation: Adopt as proposed.

#2. Pend Oreille Two Pole Fishery (Pend Oreille County)

Proposal: Allows for a two pole endorsement on the Pend Oreille River. This will increase the harvest of northern pike and assist with native salmonid recovery.

Explanation: This rule change will result in increased opportunity for harvest of northern pike in Box Canyon and Boundary reservoirs via the use of the two pole endorsement. The increased harvest of northern pike is the result of their abundance increasing dramatically in recent years, resulting in the decreased abundance of native fish and other game fishes in Box Canyon Reservoir. Allowing use of the two pole endorsement to fish these waters should result in increased revenue for the Department.

Testimony:

Overall, responses support this proposal. One concern was expressed: "I don't see many fishing two poles at once while using artificials... One is left to wonder about the introduction of foreign live baits this practice might inspire." There was also comment that this proposal can help control the growing northern pike population.

Staff Recommendation: Adopt as proposed.

#3. San Poil Season, Harvest, and Boundary Changes (Ferry County)

Proposal: Divides the San Poil River arm of Roosevelt Lake into three management sections and changes the season and harvest as follows:

Proposed Regulatory Boundaries

Boundary A –From the western shoreline at the mouth of the San Poil Arm as marked by a regulatory buoy, directly eastward across the San Poil Arm to the eastern shoreline of the San Poil Arm as marked by a regulatory buoy.

Boundary B - From the north shore of the outlet of French Johns Lake (Manila Creek) northeast across the San Poil Arm to the north shore of the outlet of Dick Creek.

Boundary C – Approximately 5 miles upstream from the outlet of French Johns Lake, as marked by regulatory buoys. Any and all waters that occur north of the regulatory buoy line at or above 1310 feet mean sea level elevation are managed under regulatory authority of the Colville Confederated Tribe of Indians.

Seasons by species:

Smallmouth bass: April 1-January 30, open from regulatory boundary A and continuing upstream to Boundary C. Bag limit of 10 fish with no more than one over 14 inches

Walleye: April 1-January 30, open from regulatory boundary A and continuing upstream to the Boundary C. Bag limit of 16 fish, with no size limit.

Rainbow trout: April 1-January 30 - Open from regulatory boundary A and continuing upstream to regulatory boundary B. Bag limit of 5 fish, with no more than 2 over 20 inches and all wild (adipose fin intact) rainbow trout must be released.

Kokanee salmon: April 1-January 30 - Open from regulatory boundary A and continuing upstream to regulatory boundary B. Bag limit of 2 fish.

Explanation: This regulation assists various species as described below:

Smallmouth Bass: Densities of smallmouth bass in the reservoir have been increasing rapidly for the past 10 years. This regulation focuses harvest on the large number of smaller fish (less than 14 inches) that have been identified as having the highest predatory impact on native and hatchery salmonids.

Walleye: Based on the Colville Tribe's fish predation and consumption work in the San Poil Arm, walleye have been identified as a concern for predatory impact on native and hatchery salmonid species. A bag limit of 16 fish can lead to a meaningful reduction in the walleye population if angler exploitation rates are high enough.

Rainbow Trout: This proposal closes the fishery when wild rainbow trout migrate through the San Poil Arm on their way to the spawning grounds in the San Poil River (February – March). This regulation protects all wild rainbow trout from harvest and allows maximum angler opportunity for hatchery rainbow trout in the lower section of the San Poil Arm, where abundant hatchery rainbow trout are found.

Kokanee: This proposal closes the fishery on kokanee when the redband trout migrate through the San Poil Arm on their way to the spawning grounds. Anglers use similar gear and methods to capture rainbow trout and kokanee, therefore this closure on kokanee benefits the rainbow trout. The San Poil Arm is a primary refuge for wild kokanee during the warm summer months. Under the current rules, anglers can retain 2 wild kokanee and continue to fish for hatchery fish in this area. The high density of wild trout in this area lends itself to potentially causing higher than normal hook and release mortality as anglers attempt to catch and retain hatchery origin kokanee.

Testimony:

Overall, responses support this proposal.

Amendment: Retain current walleye daily limit (eight) and evaluate walleye population after significant lake drawdown event.

Staff Recommendation: Adopt as amended.

#4. Lower Crab and Red Rock Creeks Chinook (Grant County)

Proposal: This proposal changes the current open time for Lower Crab and Red Rock creeks from year-round to April 1 through September 30.

Explanation: This change is expected to increase the protection of Chinook salmon. Recently, increasing numbers of Chinook have been documented spawning and rearing in Red Rock and Lower Crab creeks (Burgess 2010); however, their stock status at this time is unknown. Genetic analysis indicates these fish are unique when compared with other Columbia and Snake River Chinook stocks (Small 2010). With an increase in adult Chinook abundance, poaching has become a significant problem during October and November for both creeks. These are small and readily accessible streams where adult Chinook can easily be located and poached. Additionally, since the creeks are currently open year-round, anglers have 2+ months in which to target pre-spawn and spawning Chinook. Detachment 16 officers have encountered numerous individuals snagging, netting, and trapping adult Chinook in these creeks. Snagging is the most common offense. Changing the season on these creeks from year-round to April 1 through September 30 will protect staging and spawning Chinook. This regulation change proposal is the first step towards ensuring the long-term conservation of this unique Chinook stock by regulating angler activity when adult Chinook salmon are present in Lower Crab and Red Rock creeks.

Testimony:

Overall, responses support this proposal.

Staff Recommendation: Adopt as proposed.

#5. South Fork Toutle River

Proposal: This proposal closes the South Fork Toutle River from the mouth to the 4100 Road Bridge about two weeks earlier, on March 15th.

Explanation: This rule is expected to increase the protection of wild winter steelhead. By reducing the season length by fifteen days (from March 31 to March 15), fishing impacts (hooking mortality) on staging and spawning ESA listed wild winter steelhead will be reduced. This rule also creates consistency with wild steelhead spawner protection in neighboring streams by using the same season end date of March 15.

Testimony:

Response supports this proposal. Statement was made that this rule "...shows consistency in management of ESA listed species by WDFW in the Lower Columbia DPS."

Staff Recommendation: Adopt as proposed.

#6. Salmon Creek Closer

Proposal: This proposal closes Salmon Creek from the 72nd Avenue Bridge upstream.

Explanation: Salmon Creek has ESA listed populations of Coho and Steelhead. Closing the creek from the 72nd Bridge and above will protect valuable spawning and rearing habitat. These are small populations of fish that would be affected by fishing pressure. Recovery efforts are ongoing to restore fish populations to these upper sections of the creek.

Testimony:

Response supports this proposal. Statement was made that this rule will protect ESA listed steelhead and protect critical habitat.

Staff Recommendation: Adopt as proposed.

#7. Swift Reservoir

Proposal: Removes landlocked rules and removes the 2 pole-endorsement "from dam to markers approx 3/8 mile below Eagle Cliff Bridge."

Explanation: Protects ESA listed Chinook and coho salmon and steelhead trout that are being reintroduced above the reservoir (on the North Fork Lewis River), as well as bull trout and other salmonids. Adult ESA listed salmon are being reintroduced into the NF Lewis River above Swift Reservoir in 2012. Starting in late April, 2012 adult spring Chinook will be trucked up to and released from the Swift Boat Ramp into Swift Reservoir to spawn in the upper watershed. These will be followed by coho in the fall. There are no plans for a harvest fishery on these fish. There are no excess harvest opportunities that would support the 2 pole endorsement. This regulation change is consistent with regulations already in place in the upper part of the reservoir and addresses a critical conservation need.

Testimony:

Response supports this proposal. There was also a request to consider changing this to a year-round fishery.

Staff Recommendation: Adopt as proposed.

#8. Puget Sound Wild Steelhead Protection Rules

Proposal: Closes steelhead and other game fish early in several river systems in Puget Sound and along the Strait of Juan de Fuca to protect wild steelhead, and closes fishing for all species in sections of the Samish River. The specific changes are shown below.

Explanation: Implements by permanent rule the actions the Department made by emergency rule in 2010/2011 to protect Puget Sound steelhead trout listed under the Endangered Species Act.

Waters closing to fishing on Dec. 1 include:

Samish River System

- Samish River from I-5 Bridge to Hickson Bridge

Waters closing to fishing on Jan. 1 include:

Samish River System

- Samish mouth to Hickson Bridge

Waters closing to steelhead and other game fishing Jan. 16 include:

Green River System

- Green River mainstem from the 1'st Avenue South Bridge in Seattle upstream to the South 277'th Bridge in Auburn

Puyallup River System

- White River from the mouth to R Street Bridge in Auburn.
- Carbon River from the mouth to Highway 162 Bridge in Auburn.
- Upper Puyallup River from mouth of Carbon River upstream.

Waters closing to steelhead and other game fishing Feb. 1 include:

Green River System

- Green River Mainstem from the 277'th Bridge in Auburn upstream to the Tacoma Headworks Dam

Nooksack River System

- Nooksack River mainstem from the Lummi Indian Reservation boundary to the confluence of North and South forks.
- North Fork Nooksack River from Maple Creek to Nooksack Falls.
- Middle Fork Nooksack River from the mouth to the City of Bellingham diversion Dam.
- South Fork Nooksack River from the mouth to Skookum Creek.

Skagit River System

- Skagit River mainstem from the mouth to the Highway 530 Bridge at Rockport.
- Skagit River from the mouth of the Cascade River to the Gorge powerhouse at Newhalem.
- Sauk River from the mouth to the Whitechuck River.
- Cascade River from the Rockport-Cascade Road Bridge upstream to headwaters.

Snohomish River System

- Snohomish River from the mouth (Burlington Northern railroad bridge) upstream to the confluence of the Skykomish and Snoqualmie rivers.
- Skykomish River from the mouth to the Highway 2 Bridge at the Big Eddy Access.
- Pilchuck River from the mouth to 500 feet downstream of the Snohomish city diversion dam.

- Sultan River from the mouth to 400 feet downstream of diversion dam (river mile 9.7).
- Wallace River from 200 feet upstream of water intake of salmon hatchery to Wallace Falls.
- North Fork Skykomish River from the mouth to 1,000 feet downstream of Bear Creek Falls.
- South Fork Skykomish River from the mouth to 600 feet downstream of Sunset Falls fishway.
- Snoqualmie River from the mouth to the boat ramp at Plum access.
- Tolt River from the mouth to the USGS trolley cable near confluence of North and South forks.
- Raging River from the mouth to Highway 18 Bridge.

Stillaguamish River System

- Stillaguamish River from Marine Drive upstream to forks.
- Pilchuck Creek from the mouth to Highway 9 Bridge.
- North Fork Stillaguamish River from the mouth to the mouth of French Creek.
- South Fork Stillaguamish River from the mouth to 400 feet below the Granite Falls fishway outlet.
- Canyon Creek from the mouth upstream.

Strait of Juan de Fuca

- Dungeness River from the mouth upstream to the forks at Dungeness Forks Campground.
- Morse Creek from the mouth to the Port Angeles Dam.
- Salt Creek from the mouth to the bridge on Highway 112.
- Deep Creek from the mouth upstream.
- Pysht River from the mouth upstream.
- Clallam River from the mouth upstream.
- Sekiu River from the mouth to forks.

Waters closing to steelhead and other game fishing Feb. 16 include:

- North Fork Nooksack River from the mouth to Maple Creek.
- Skykomish River from the Highway 2 Bridge at the Big Eddy Access to the confluence of North and South forks.
- Wallace River from the mouth (farthest downstream railroad bridge) to 200 feet upstream of the water intake of salmon hatchery.
- Snoqualmie River from the boat ramp at Plum access to Snoqualmie Falls.
- Tokul Creek from the mouth to the posted cable boundary marker.
- North Fork Stillaguamish River from the mouth of French Creek to the Swede Heaven Bridge.
- Skagit River from the Highway 530 Bridge at Rockport to the mouth of the Cascade River.
- Cascade River from the mouth to Rockport-Cascade Road Bridge.

Testimony:

Several comments are strongly opposed to the early closure of these rivers and lost fishing opportunity. Some comments received request catch and release fishing for wild steelhead. There have been suggestions for adjustments to specific rules, as well as requests that only barbless hooks be used.

Four people testified about wild steelhead protection at the Public Hearing, which occurred at the January 7th Commission meeting. One person requested that the Department not close the lower Skagit fishery because fishers don't target wild steelhead there. Three people requested that the department do more toward conservation than just the stream strategy.

Staff Recommendation: Adopt as proposed.

#9. Puget Sound Sturgeon

Proposal: This proposal closes all Puget Sound marine waters and tributaries to the retention of sturgeon. Catch and release fishing will still be allowed.

Explanation: The proposal is designed to protect Columbia River sturgeon that venture into Puget Sound to feed. Harvest of sturgeon in Puget Sound has doubled in the past few years. In addition, there are also concerns with the Frazer River sturgeon, which are also harvested in Puget Sound. Implementation of catch and release fisheries is consistent with fishery regulations in Canadian waters. The mortality rate of sturgeon released from recreational fishing gear is believed to be low (<5%). A non-retention fishery will provide fishing opportunities for this popular species with limited impacts to the population.

Testimony:

Many responses oppose this rule proposal. Ten people opposed this proposal at the Public Hearing, which occurred at the January 7th Commission meeting, and a petition with over 2600 signatures was presented. A suggestion that 3% of the harvest allocation be allowed the Puget Sound fishery and a request to include Puget Sound in sturgeon harvest allocation discussions were offered.

Comment against this proposal include: people up north do not take as many fish as the Columbia; do not let the commercials and guides take this opportunity away from us for money; this is not supported by science; WDFW has not shown this rule change is necessary for conservation; tribal co-managers are increasing retention while the sport fishery is reduced. Additional comment included: retention of at least one sturgeon from Puget Sound will prevent fishers from having to drive six to seven hours; allow protection to the resource; provide harvest report card data; and promote recreational and economic benefits.

During the public meetings, there were comments in support of this proposal. There were questions about how mortality is assigned to sturgeon that are captured and released, including in the presence of marine mammal predators, and a statement that 5% mortality is not acceptable to salmon stocks.

There were also suggestions for modifying the proposal:

- allow Puget Sound 3% of the harvestable Columbia River fish
- shorten season or cut back to three fish a year instead of five
- close the night or the saltwater fisheries
- shorten season to six months (March 1 through Aug 31st)
- limit annual retention to two fish
- shrink retention length (45" -55" forklength); allow retention of one legal sturgeon (38"-54") in each tributary, with no more than five per year (including the Columbia River)
- allow one legal sturgeon 38"-54" in each tributary, not to exceed five total fish per year including any catch in conjunction with the Columbia River.
- allow retention of one fish per year in the Skagit, Stillaguamish, and Snohomish river systems, so that only three fish could be caught separately from the Columbia River system.
- eliminate sturgeon fisheries

Amendment: Retention season of May 15 through June 30. Provide reduced sturgeon retention opportunities consistent with Columbia River sturgeon conservation and management needs.

Staff Recommendation: Adopt as amended.

#10. Coastal Stream Strategy

Proposal: Closes all coastal rivers, streams, and beaver ponds to fishing, except as listed in the Fishing in Washington Rules Pamphlet. Rivers, streams, and beaver ponds listed in the pamphlet as “open to fishing” will be identified for areas where stocks are robust and can support fishing pressure, as well as in areas where reasonable recreational opportunity exists.

Explanation: With various fish populations across the state being listed under the Endangered Species Act, a more conservative approach to the regulation of fishing in rivers, streams, and beaver ponds is essential and requires WDFW to provide as much protection as possible for all life stages of these populations, in particular for rearing juveniles. The difficulty is how to provide protection for these stocks of fish while also offering reasonable recreational opportunity. Currently, the standard stream rule opens rivers, streams, and beaver ponds to fishing for game fish from the first Saturday in June through October 31, with an 8” minimum size and two fish per day limit. Consequently, much of the juvenile rearing habitat for resident trout and Dolly Varden, as well as for anadromous salmon, steelhead, cutthroat, and bull trout, is currently open for fishing. As a result, these juvenile salmonids are at risk of being incidentally caught and may not survive being handled and released, especially if bait is used.

A more conservative management strategy to protect these stocks is to close all rivers, streams, and beaver ponds to fishing, except as listed in the Fishing in Washington Rules Pamphlet. Rivers, streams, and beaver ponds listed in the pamphlet as “open to fishing” will be identified for areas where stocks are robust and can support fishing pressure, as well as in areas where reasonable recreational opportunity exists. The primary goal is to protect stocks at certain times of the year and in areas where they are most susceptible to mortality that may be associated with recreational angling. This strategy has been successful in Puget Sound and the Strait of Juan de Fuca and is now being proposed for streams that drain into the coastal areas.

These documents present the fishing opportunity that will be available in the coastal drainages. Areas open to fisheries are presented by river systems unless the waters drain directly to salt water. All salmon seasons listed are *last year’s* seasons and are subject to change. Since the basic rule in these areas would be “closed unless listed” there are “closed water” areas that will no longer be highlighted. Some of these closed areas are still listed in the tables to clarify the intent of the proposals. The last column in each table is a letter listing, from A-F. These are the reasons for the proposed changes. Rules that remain unchanged will not have a letter in this column. Descriptions of the A-F listing are shown in the table below.

Stream Strategy Table.

Code	Steelhead Status	Trout Rules	Fishing/Conservation
A	Resident zone	8" minimum size, daily limit 2, bait allowed.	Fishing: resident fish opportunities usually above anadromous zone, hatchery steelhead may be available
			Conservation: allows most resident trout to spawn once before harvest
B	Resident zone/resident fish concerns	8" minimum size, daily limit 2 fish, selective gear rules.	Fishing: resident fish opportunities usually above anadromous zone, hatchery steelhead may be available
			Conservation: allows most resident trout to spawn once before harvest, reduces C&R mortality associated with use of bait
C	Status good or anadromous fish juvenile presence low	14" minimum size, daily limit 2, bait allowed.	Fishing: resident trout, sea-run cutthroat, salmon, hatchery steelhead
			Conservation: 14" minimum size protects overwintering SH, allows resident trout and sea-run cutthroat to spawn once before retention.
D	Status bad or SH anadromous fish juveniles present	14" minimum size, daily limit 2, selective gear rules.	Fishing: resident trout, sea-run cutthroat, salmon, hatchery steelhead
			Conservation: selective gear rules. Reduces the catch & release mortality associated with use of bait. 14" minimum size protects overwintering SH, allows resident trout and sea-run cutthroat to spawn once before retention.
E	Status bad	Selective gear rules and catch&release, except ,may retain 2 hatchery steelhead	Fishing: opportunity for harvest of hatchery steelhead, often includes catch&release opportunity for sea-run cutthroat and wild steelhead. Conservation: selective gear rules reduces the catch&release mortality associated with the use of bait. Protection provided for all trout life history stages.
F	Status bad	Catch&release, selective gear rules	Fishing: no hatchery steelhead present, catch&release opportunity for trout, which may include wild steelhead. Conservation: selective gear rules reduces the C&R mortality associated with the use of bait. Protection provided for all trout life history stages.

Testimony:

Three people testified about the Willapa rules at the Public Hearing, which occurred at the January 7th Commission meeting. They requested that we not close the Willapa and Naselle area fisheries until the escapement model has been revised, because it is not accurate. They also requested that we adopt selective fishing methods, have only bank fisheries, or catch and release until the model is revised.

There have been suggestions for adjustments to specific rules, as well as requests that only barbless hooks be used and that there be no retention of wild steelhead. There was a comment to limit fishing in the mainstem rivers where 50-75% of the steelhead spawning occurs. A request was made to increase the daily limit of trout in streams from two to five. Some comment expressed concern that the escapement goals for the Willapa River are set too high.

Requests for modifications include: do not close Willapa Bay tributaries early; change the current regulation that does not allow fisher to keep trout from any river/creek that flows into Willapa Bay; suggestions for the

Dickey River rules; add the following streams Petroleum, Cole, Quinn, South, Palmquist, Cedar, Siwash, and Elk; keep the catch and release dates for wild steelhead in the Naselle River the same with an April 15 closure because the winter steelhead hatchery run has been mostly a failure for the past 15 years; discontinue bait after the end of salmon fishing in December of each year; remove the internal combustion motor restriction on the Palix River.

Amendment: Based on public comment, retain current seasons for the Willapa and Naselle systems and review escapement goals for steelhead populations in these rivers. Include additional trout fishing opportunity in stream reaches without anadromous fish concerns.

Staff Recommendation: Adopt as amended.

RECREATIONAL OPPORTUNITY

#11. Lowland Lake Season

Proposal: Opens the Lowland Lake Season, “on the fourth (4th) Saturday in April.” Currently, the season opens the last Saturday in April.

Explanation: For three of the next seven years, there will be five Saturdays in April. This proposal opens fishing one weekend earlier in years where there is a fifth Saturday in April.

Testimony:

Overall, response supports this proposal. A response that opposes this rule change says that the original rule was put in place to ensure year to year consistency in the rules and to have opening day when the chance for good weather is high. There are a few requests for modifications that include:

- For Lake Whatcom in Whatcom County, because of the strong density of smallmouth bass populations that the lake opens by January 1 of each year for smallmouth and largemouth bass retention. “The fishing methods and tackle used, and the prominent identification marks of these fish differentiate drastically from any anadromous salmon or trout species (especially cutthroat) thereby making enforcement easily determined by wildlife officers and Fisherpersons alike.”
- Open the season earlier, on March 1st or lift the season regulation. Currently one has to travel far to large bodies of water that are not as safe to take a young child. If needed, could restrict the winter or early season catch to allow only one fish or catch and release.
- Extend the season for lakes that close September 30th to October to provide an economic and opportunity benefit. If this is a management issue, allow catch and release fishing.

Staff Recommendation: Adopt as proposed.

#12. Roosevelt Lake Walleye

Proposal: Increases the daily limit of walleye in Roosevelt Lake from 8 to 16 fish per day (only 1 over 22” may be retained).

Explanation: This will improve walleye fishing and reduce this species’ predation on trout. The overabundant population of walleye in Roosevelt Lake exhibits a low body condition (many young, skinny

walleye). This is a result of reservoir dynamics, consistent large year class recruitment and limited forage. In 2007, the Fish and Wildlife Commission adopted a daily limit of eight walleye (with only one fish over 22") to reduce the number of small walleye and balance the population. To achieve walleye and trout management objectives, the Department estimated at that time that 75,000 to 100,000 walleye would need to be caught and removed from Roosevelt Lake annually. Between 2007 and 2009 the average number of walleye harvested annually was just under 40,000 fish. Current fishing effort has not been sufficient to achieve the intended level of harvest. To be effective, current modeling suggests the number of walleye harvested annually will need to more than double.

Testimony:

There have been many responses regarding this proposal. Two people opposed this at the Public Hearing, which occurred at the January 7th Commission meeting. They requested that we not make changes for another year or two and one of them suggested that if any rule is adopted, it be for an eight fish bonus fishery where the fish are less than 14 to 16 inches.

Comments against this proposal include: this is not supported by science; I have never seen Lake Roosevelt walleyes at lower population densities or in better condition than the fish are right now; the conclusion of the studies done on Lake Roosevelt lead us to believe the biggest impact on the kokanee and rainbow is not predation of walleye alone, but a combination of fluctuation of water levels, loss of habitat, loss of forage, and increased population of other piscivore fish.

Comments in support of this proposal include: this is sound management that will contribute to the survival of native salmonids, particularly the free flowing American Reach segment; recommend adoption of the Upper Columbia Native Fish Alliance plan, where a native fish segment is established .

The Inland Fish Policy Advisory Group recommended to modifying the proposal to provide a bonus catch of eight fish that are less than 14-16 inches to focus the additional harvest on the smaller size fish.

Staff Recommendation: Do not adopt. Retain current walleye daily limit (eight) and evaluate walleye population after significant lake drawdown event.

#13. Lower Spokane River 2-Pole and Kokanee fisheries

Proposal: Allows 2-pole endorsement fishing in the Lower Spokane River from the mouth (SR 25 bridge) to 400' below Little Falls Dam. Also adds a kokanee fishery that is year round, with no minimum size, a daily limit of 6 fish, and up to two fish with an adipose fin. Provides a walleye fishery from June 1 to March 31 with no minimum size limit and harvest of 16 fish, with no more than 1 fish over 22".

Explanation: Provides increased opportunity by allowing 2 poles and increased daily limit for walleye. Also maximizes recreational opportunity of hatchery kokanee that are released as mitigation for hydropower construction and operations' impacts in Lake Roosevelt.

Testimony:

Overall, responses support this proposal. There was a suggestion for a no-kill on wild kokanee throughout the entire system until spawning habitat can be identified and improved enough to provide sustaining numbers. There was also comment that this proposal can help control the growing northern pike population.

Amendment: Retain current walleye daily limit (eight) and evaluate walleye population after significant lake drawdown event.

Staff Recommendation: Adopt as amended.

#14. Kettle River Fishery Additions

Proposal: Removes selective gear rules in a portion of the upper Kettle River near the town of Curlew.

Explanation: Provides recreational opportunity through removing selective gear rules from the Canadian Border upstream to Hwy 21 Bridge at Curlew.

Testimony:

There was much comment about this proposal, with a majority against in emails and at the public meetings. One person testified in favor of this proposal only if it is for juveniles at the Public Hearing, which occurred at the January 7th Commission meeting. A petition was received in late December with 550 signatures in favor of opening the entire Kettle River to bait fishing. Comment against includes: since selective rules were implemented, the fish seem more abundant; there are plenty of places to fish with bait; concern for the native redband trout population if bait is allowed; the Kettle River is a gem and it would be a shame to allow bait again and see the trout population decrease because some people think selective gear rules are elitist; the river already has problems with temperature and the relatively pure strain of redbands have withstood the test of time in this corner of the state; the river fishes quite well with a single barbless hook on a Castmaster, Blue Fox Spinner or a fly; live bait will devastate the sport fish in the river and this will have a negative impact on tourism; live bait is an opportunity to rapidly deteriorate the fishing opportunity for everyone; I don't believe there is any logical justification to change the present regulations on the Kettle.

Amendment: Require selective gear rules for adults and remove selective gear rules for juveniles 14 years and younger. This modification will provide opportunity for juvenile anglers to fish with bait while maintaining more conservative regulation for adult anglers in this section of the Kettle River.

Staff Recommendation: Adopt as amended.

#15. Puget Sound Stream Strategy, Additional Trout Opportunity

Proposal: This proposal opens areas to fishing for game fish (typically above anadromous barriers) that were inadvertently closed as part of the Puget Sound Stream Strategy.

Skagit County

Harrison Slough: All Game Fish – First Sat. in June-October 31: statewide min. size/daily limit.

Snohomish County

Copper Creek (tributary to Clear Creek, tributary to Sauk River): All Game Fish – First Sat. in June-October 31: statewide min. size/daily limit.

Chaplain Creek (tributary to Sultan River): First Sat. in June-October 31: statewide min. size/daily limit.

Black Creek above the confluence of Black and Bear creeks (tributary to South Fork Stillaguamish River): First Sat. in June-October 31: statewide min. size/daily limit.

Marsh Creek (above the falls at its mouth and its tributaries, tributary to Sultan River): First Sat. in June-October 31: statewide min. size/daily limit.

Tributaries to North Fork Skykomish River upstream of Deer Falls: First Sat. in June-October 31: statewide min. size/daily limit.

Tributaries to North Fork Stillaguamish River upstream of falls: First Sat. in June-October 31: statewide min. size/daily limit.

Tokul Creek and its tributaries above Tokul Road SE: First Sat. in June-October 31: statewide min. size/daily limit.

Tributaries to Wallace River upstream of Wallace Falls: First Sat. in June-October 31: statewide min. size/daily limit.

Youngs Creek and its tributaries above the Potson Road/ 299TH Avenue SE Bridge (tributary to Elwell Creek; tributary to Skykomish River near Sultan): First Sat. in June-October 31: statewide min. size/daily limit.

East Fork Woods Creek and its tributaries, including beaver ponds (upstream of Old Pipeline Rd.): First Sat. in June-October 31: statewide min. size/daily limit.

Olney Creek (upstream of Olney Falls, including tributaries and beaver ponds): First Sat. in June-October 31: statewide min. size/daily limit.

Pierce County

Clarks Creek: mouth to 12th Ave SE - First Sat. in June-August 15: two trout over 14". Selective gear rules.

Hylebos Creek: First Sat. in June-October 31: two trout over 14". Selective gear rules.

Explanation: These waters are either above anadromous barriers or are areas where there are no concerns for juvenile anadromous salmonids. This will provide increased recreational opportunity for trout and other game fish.

Testimony:

There have been suggestions for adjustments to specific rules. One comment said the department should reconsider these changes until the relationship between rainbow trout and steelhead is better understood.

Staff Recommendation: Adopt as proposed.

#16. Wind River Increased Open Area

Proposal: Opens an area of the (Upper) Wind River by approximately two miles during the fall (September 16 through November 30) catch and release season for steelhead trout.

Explanation: Wild steelhead trout are currently meeting escapement goals (last 10 of 10 years), and the catch and release fishery has been occurring annually since 2006. The minimum escapement goal of 500 adults has been met each year since 2002. In addition, spring Chinook are not present during this time period. The area holds excellent opportunity for sport catch and release fishing on public land. Public land is limited where the good fishing is, and this provides approximately two miles of additional opportunity. This fishery is becoming more popular every year, will not result in a conservation concern for wild steelhead, and is a significant recreational opportunity that will generate revenue.

Testimony:

Response supports this rule change. Comments received include: request to open resident trout waters on Memorial Day weekend; question whether this will increase revenue; believe it is best to leave well enough alone, the fish do not need to be targeted with an extended season or additional pressure due to being the local area to have a catch and release fishery. Suggestions were made for wording that adds beaver ponds into many of the descriptions.

Staff Recommendation: Adopt as proposed.

#17. Wynoochee River Steelhead Opportunity

Proposal: This proposal allows fishing from a floating device, from the 7400 Line Bridge to above the mouth of Schafer Creek. Internal combustion motors will be prohibited.

Explanation: This will increase hatchery steelhead recreational opportunity by 10.5 river miles. Currently this area cannot be accessed because there is limited bank access and fishing is prohibited from a boat. Removing the prohibition to fish from a boat will increase hatchery steelhead catch in a system where there is surplus and provide increased recreational harvest.

Testimony:

One comment received opposed the rule and would like to see the rule remain the same with bank access only.

Staff Recommendation: Adopt as proposed.

#18. Lingcod Spearfishing Season

Proposal: Removes the lower size limit for lingcod spearfishing.

Explanation: Accurately gauging the size of lingcod underwater can be difficult because of the water magnification that occurs. The impact to lingcod by removing the lower size limit for spear fishing is expected to be minimal based on current spearfishing effort. Lingcod are not currently being overfished in Puget Sound. Recreational catch per unit effort is near the long-term average; though it does show a recent decline --and the Department is currently monitoring the fishery as a result.

Testimony:

Comments received supporting the regulation include: I am in support of returning the previous lingcod rule for spearfishing. Removing the slot limit from spearfishing would be an intelligent conservation measure by reducing wastage of lingcod shot and measured after they are dead. There was also a comment from a supporter of the rule that stated spearfishers are a very small portion of the pressure on the resource and they're not getting fair opportunity.

Comment received opposing the regulation include: The impact will be greater than the department assumes as many divers will take a small lingcod prior to leaving the water if larger ones are unavailable; if we are trying to protect the species through a slot size retention then we should do exactly that; why is the measuring underwater issue not relevant on the upper end of the size limit?

Staff Recommendation: Adopt as proposed.

RECOMMENDED ADJUSTMENTS Sportfishing Regulations 2012-13

The following recommended adjustments are a result of proposed changes to WACs filed in the CR102 (WSR 11-23-174) based on public comment and implementing the Governor's Executive Order 10-06 suspending non-critical rule development and adoption through December 2011.

Attachment 1 Purpose of the proposal, its anticipated effects, including any changes in existing rules and reasons supporting proposal:

WAC 220-12-090 Classification—nonnative aquatic animal species. Provides sportfishing rules for Northern Pike, which are removed from being classification as a game fish through WAC 232-12-019 below.

WAC 220-55-220 Two pole endorsement. Allows fishing with two poles in the Pend Oreille River and the lower portion of the Spokane River provide opportunity and removes it from the Swift Reservoir to protect ESA listed salmon and trout that are being reintroduced to the area.

WAC 220-56-100 Definitions—personal use fishing. Opens the Lowland Lake Season on the fourth Saturday in April. Currently, the season opens the last Saturday in April. This will provide additional opportunity for years that have five Saturdays in April.

WAC 220-56-235 Possession limits—bottomfish. Removes the lower size limit for lingcod spearfishing.

WAC 220-56-282 Sturgeon—areas, season, limits and unlawful acts. ~~Closes all Puget Sound tributaries to the retention of sturgeon, while allowing catch and release fishing~~ Creates retention season for Puget Sound and its tributaries from May 15 through June 30. Conservation rule addresses concern for populations in this geographic area and limitations for managing them.

WAC 232-12-019 Classification of gamefish. Removes northern pike from listing as a game fish. Currently this species is listed as both a game fish and as a prohibited species.

WAC 232-28-619 Washington food fish and game fish – freshwater exceptions to statewide rules.

Addresses conservation concerns:

San Poil River has season, harvest, and boundary changes; retain the walleye daily limit of eight fish. Lower Crab and Red Rock creeks' fishing season is reduced from year-round to April 1 through September 31. A section of the South Fork Toutle River closes earlier to protect wild steelhead. A section of Salmon Creek in Lewis County closes to protect spawning and rearing habitat. Landlocked rules in Swift Reservoir removed to protect Endangered Species Act listed salmon and trout that are being reintroduced. Several systems in Puget Sound and the Strait of Juan de Fuca close earlier to protect wild steelhead, implementing by permanent rule changes that were made in 2010/2011 by emergency regulation. Closes all coastal rivers, streams, and beaver ponds to fishing, except as listed in the pamphlet; fishing areas will be identified for areas where stocks are robust and can support fishing pressure, as well as in areas where reasonable recreational opportunity exists. Retains current seasons

for the Willapa and Naselle systems. Provides additional trout fishing opportunity provided in stream reaches without anadromous fish concerns.

Provides recreational opportunity:

~~Lake Roosevelt walleye fishers are allowed an additional eight fish daily limit.~~ Sections in lower Spokane River are identified for additional ~~walleye and~~ kokanee daily limits. Selective gear rules are removed from a section of the Kettle River so that juvenile (age 14 and younger) fishers may use bait. Additional trout opportunity provided in areas of Puget Sound where there are not concerns about anadromous fish conservation. Increased area of Wind River allowed for catch and release steelhead fishing. Section of Wynoochee River is opened for fishing from a boat.

AMENDATORY SECTION (Amending Order 10-64, filed 3/19/10, effective 5/1/10)

WAC 220-12-090 Classification--Nonnative aquatic animal species. (1) Prohibited aquatic animal species. The following species are classified as prohibited aquatic animal species:

(a) Amphibians:

(i) In the family Hylidae: Cricket frog, in the genus *Hyla* species in the group *Arborea* including: *Hyla annectans*, *Hyla arborea*, *Hyla chinensis*, *Hyla hallowellii*, *Hyla immaculata*, *Hyla japonica*, *Hyla meridionalis*, *Hyla sanchiangensis*, *Hyla simplex*, *Hyla suweonensis*, *Hyla tsinlingensis*, *Hyla ussuriensis*, and *Hyla zhaopingensis*.

(ii) In the family Pelobatidae, spadefoots, all species of the genus *Pelobates* including *P. cultripes*, *P. fuscus*, *P. syriacus*, and *P. varaldii*. All species of the genus *Scaphiopus* including: *S. couchii*, *S. holbrookii*, and *S. hurterii*. All species of the genus *Spea* including: *S. hurterii*, *S. bombifrons*, *S. hammondii*, and *S. multiplicata* with the exception of the native species: *Spea intermontana* the great basin spadefoot.

(iii) In the family Pipidae: African clawed frog, all members of the genera *Silurana*, and *Xenopus*.

(iv) In the family Ranidae:

(A) Bull frog, *Rana catesbeiana*.

(B) Holarctic brown frogs and Palearctic green frogs of the

genus *Rana*, including the following: *Rana arvalis* group (*R. arvalis*, *R. chaochiaoensis*, *R. chevronta*); *Rana chensinensis* group (*R. altaica*, *R. chensinensis*, *R. dybowskii*, *R. kukunoris*, *R. kunyuensis*, *R. ornativentris*, *R. pirica*); *Rana graeca* group (*R. graeca*, *R. italica*); *Rana japonica* group (*R. amurensis*, *R. aragonensis*, *R. japonica*, *R. omeimontis*, *R. zhenhaiensis*); the subgenus *Rugosa* (*Rana rugosa*, *Rana emeljanovi*, *Rana tientaiensis*); *Rana tagoi* group (*R. sakurarii*, *R. tagoi*); *Rana temporaria* group (*R. asiatica*, *R. dalmatina*, *R. honnorate*, *R. huanrenensis*, *R. iberica*, *R. latastei*, *R. macrocnemis*, *R. okinavana*, *R. pyrenaica*, *R. tsushimensis*, *R. zhengi*); and in the *Rana Pelophylax* section, the subgenus *Pelophylax* (*R. bedriagae*, *R. bergeri*, *R. cerigensis*, *R. chosenica*, *R. cretensis*, *R. demarchii*, *R. epeirotica*, *R. fukienensis*, *R. grafti*, *R. hubeiensis*, *R. lateralis*, *R. lessonae*, *R. nigrolineata*, *R. nigromaculata*, *R. perezi*, *R. plancyi*, *R. porosa*, *R. ridibunda*, *R. saharica*, *R. shqipERICA*, *R. shuchinae*, *R. terentievi*, *R. tenggerensis*); and the *Rana ridibunda*-*Rana lessonae* hybridogenetic complex species *R. esculenta* and *R. hispanica*.

(v) In the family Ambystomatidae: Mole salamanders. In the genus *Ambystomata*: *A. californiense*, *A. laterale*, *A. opacum*, *A. rosaceum*, *A. tigrinum*, except for the native species *A. tigrinum mavortium* Western tiger salamander, and *A. tigrinum melanostictum* Tiger salamander.

(vi) In the family Amphiumidae one, two, and three toed salamanders or congo eels: All members of the genus *Amphiuma*.

(vii) In the family Cryptobranchidae: Giant salamanders and hellbenders, all members of the genera *Andrias* and *Cryptobranchus*.

(viii) In the family Dicamptodontidae, American giant salamanders, all members of the genus *Dicamptodon*, except for the native species: *Dicamptodon tenebrosus*, Pacific giant salamander, and *Dicamptodon copei*, Cope's giant salamander.

(ix) In the family Hynobiidae: Mountain salamanders, all members of the genera *Batrachuperus*, *Hynobius*, *Liua*, *Onychodactylus*, *Pachyhynobius*, *Pseudohynobius*, *Ranodon*, and *Salamandrella*.

(x) In the family Plethodontidae, subfamily Desmognathinae: All members of the genus *Desmognathus*, dusky salamander.

(xi) In the family Plethodontidae, subfamily Plethodontinae: All members of the genera *Aneides* (climbing salamanders); *Batrachoseps* (slender salamanders); *Eurycea* (American brook salamanders); *Gyrinophilus* (cave salamanders); *Hemidactylium* (four-toed salamanders); *Hydromantes* (web-toed salamanders); *Plethodon* (woodland and slimy salamanders); *Pseudotriton* (mud or red salamanders), and *Speleomantes* (European salamanders).

(xii) In the family Proteidae, mudpuppies, all members of the genus *Necturus* and *Proteus*.

(xiii) In the family Salamandridae: Newts, all members of the genera *Chioglossa*; *Eichinotriton* (mountain newts); *Euproctus* (European mt. salamander); *Neurergus* (Kurdistan newts); *Notophthalmus* (red-spotted newts); *Pachytriton* (Chinese newts); *Paramesotriton* (warty newts); *Salamandrina* (speckled salamander); *Taricha* except for the native species *Taricha granulosa granulosa* the Northern rough-skinned newt, and *Triturus* (alpine newts).

(xiv) In the family Sirenidae, sirens, all species of the genera *Pseudobranchus* and *Siren*.

(b) Reptiles:

(i) In the family Chelydridae, snapping turtles, all species.

(ii) In the family Emydidae:

(A) Chinese pond turtles, all members of the genus *Chinemys*.

(B) Pond turtles, all members of the genus *Clemmys*.

(C) European pond turtle, *Emys orbicularis*.

(D) Asian pond turtle, all members of the genus *Mauremys*.

(iii) In the family Trionychidae, American soft shell turtles, all members of the genus *Apalone*.

(c) Crustaceans:

(i) Family Cercopagidae:

(A) Fish hook water flea, *Cercopagis pengoi*.

(B) Spiny water flea, *Bythotrephes cederstroemi*.

(ii) Family Grapsidae: Mitten crabs: All members of the genus *Erochier*.

(iii) Family Cambaridae: Crayfish: All genera, except a person may possess and transport dead prohibited crayfish species obtained under the department's recreational crayfishing rules (WAC 220-56-336 and 220-56-315). There is no daily limit, size limit, or sex restriction for prohibited crayfish species. All nonnative crayfish must be kept in a separate container from native crayfish. Release of any live crayfish species into waters other than the water being fished is prohibited.

(iv) Family Parastacidae: Crayfish: All genera except *Engaeos*, and except the species *Cherax quadricarinatus*, *Cherax papuanus*, and *Cherax tenuimanus*.

(v) Family Portunidae: European green crab, *Carcinus maenas*.

(vi) Family Spheromatidae: Burrowing isopod, *Sphaeroma quoyanum*.

(d) Fish:

(i) Family Amiidae: Bowfin, grinnel, or mudfish, *Amia calva*.

(ii) Family Channidae: China fish, snakeheads: All members of the genus *Channa*.

(iii) Family Characidae: Piranha or caribe: All members of the genera *Pygocentrus*, *Rooseveltiella*, and *Serrasalmus*.

(iv) Family Clariidae: Walking catfish: All members of the family.

(v) Family Cyprinidae:

(A) Fathead minnow, *Pimephales promelas*.

(B) Carp, Bighead, *Hypophthalmichthys nobilis*.

(C) Carp, Black, *Mylopharyngodon piceus*.

(D) Carp, Grass (in the diploid form), *Ctenopharyngodon idella*.

(E) Carp, Silver, *Hypophthalmichthys molitrix*.

(F) Ide, silver orfe or golden orfe, *Leuciscus idus*.

(G) Rudd, *Scardinius erythrophthalmus*.

(vi) Family Gobiidae: Round goby, *Neogobius melanostomus*.

(vii) Family Esocidae: Northern pike, *Esox lucius*: A person may possess and transport dead prohibited Northern pike obtained under the department's recreational sport fishing rules (WAC 220-56-100 and 220-56-115). There is no minimum size, no daily limit, and no possession limit. Release of any live Northern pike into water other than the water being fished is prohibited.

(viii) Family Lepisosteidae: Gar-pikes: All members of the family.

(e) Mammals:

Family Myocastoridae: Nutria, *Myocastor coypu*.

(f) Molluscs:

(i) Family Dreissenidae: Zebra mussels: All members of the genus *Dreissena* and all species known as quagga.

(ii) Family Gastropoda: New Zealand mud snail, *Potamopyrgus antipodarum*.

(2) Regulated aquatic animal species. The following species are classified as regulated aquatic animal species:

(a) Crustaceans:

All nonnative crustaceans classified as shellfish.

(b) Fish:

(i) All nonnative fish classified as food fish and game fish.

(ii) Family Cichlidae: Tilapia: All members of the genera *Tilapia*, *Oreochromis*, and *Sartheradon*.

(iii) Family Clupeidae: Alewife, *Alosa pseudoharengus*.

(iv) Family Cyprinidae:

(A) Common carp, koi, *Cyprinus carpio*.

(B) Goldfish, *Carassius auratus*.

(C) Tench, *Tinca tinca*.

(D) Grass carp (in the triploid form), *Ctenopharyngodon idella*.

(v) Family Poeciliidae: Mosquito fish, *Gambusia affinis*.

(c) Molluscs:

(i) All nonnative molluscs classified as shellfish.

(ii) Family Psammobiidae: Mahogany clam or purple varnish clam, *Nuttalia obscurata*.

(3) Unregulated aquatic animal species. The following species

are classified as unregulated aquatic animal species: None.

[Statutory Authority: RCW 77.12.047. 10-07-105 (Order 10-64), § 220-12-090, filed 3/19/10, effective 5/1/10; 04-01-096 (Order 03-312), § 220-12-090, filed 12/16/03, effective 1/16/04; 02-19-007 (Order 02-223), § 220-12-090, filed 9/5/02, effective 10/6/02.]

AMENDATORY SECTION (Amending Order 10-64, filed 3/19/10, effective 5/1/10)

WAC 220-56-100 Definitions--Personal-use fishing. The following definitions apply to personal use fishing in Titles 220 and 232 WAC:

(1) "Anadromous game fish" means steelhead, sea-run cutthroat trout, and sea-run Dolly Varden/bull trout.

(2) "Anti-snagging rule" means:

(a) Except when fishing with a buoyant lure (with no weights added to the lure or line) or trolling from a vessel or floating device, terminal fishing gear is limited to a lure or bait with one single point hook.

(b) Only single point hooks measuring not more than 3/4 inch from point to shank may be used and all hooks must be attached to or below the lure or bait.

(c) Weights may not be attached below or less than 12 inches above the lure or bait.

(3) "Bait" means any substance which attracts fish by scent or flavors. Bait includes any lure which uses scent or flavoring to attract fish.

(4) "Barbless hook" means a hook on which all barbs have been deleted when manufactured or filed off or pinched down.

(5) "Bass" means largemouth and smallmouth bass.

(6) "Bow and arrow fishing" means any method of taking, or

attempting to take, fish by the use of an arrow equipped with a barbed head and a line attached, and propelled by a bow, as in the sport of archery, while the fisher is above the surface of the water.

(7) "Buoy 10 line" means a true north-south line projected through Buoy 10 at the mouth of the Columbia River. "Buoy 10 fishery" means a fishery between a line in the Columbia River from Tongue Point in Oregon to Rocky Point in Washington and the Buoy 10 line.

(8) "Buoyant lure" means a lure that floats on the surface of freshwater when no additional weight is applied to the line or lure, and when not being retrieved by a line.

(9) "Channel Marker 13 line" means a true north-south line through Grays Harbor Channel Marker 13.

(10) "Daily limit" means the maximum number or pounds of fish, shellfish, or seaweed of the required size of a given species or aggregate of species which a person may retain in a single day.

(11) "Fresh" means fish or shellfish that are refrigerated, iced, salted, or surface glazed.

(12) "Freshwater area" means:

(a) Within any freshwater river, lake, stream or pond.

(b) On the bank or within 10 yards of any freshwater river, lake, stream or pond.

(c) On or within any boat launch, ramp, or parking facility associated with any freshwater river, lake, stream or pond.

(13) "Frozen" means fish or shellfish that are hard frozen throughout.

(14) "Gaffing" means an effort to take fish by impaling the fish with a hook attached directly to a pole or other device.

(15) "Hatchery" when used to describe the difference between a hatchery fish and a nonhatchery fish, except salmon, means a fish having a clipped adipose fin or a clipped ventral fin with a healed scar at the location of the clipped fin. A hatchery salmon is a salmon having a clipped adipose fin and a healed scar at the location of the clipped fin, regardless of whether the fish is missing a ventral fin.

(16) "Hook" means one single point, double or treble hook. A "single point hook" means a hook having only one point. A "double hook" means a hook having two points on a common shank. A "treble hook" means a hook having three points on a common shank.

(17) "Hook and line" or "angling" shall be identical in meaning and, except as provided in WAC 220-56-115, shall be defined as the use of not more than one line with three hooks attached to a pole held in hand while landing fish, or the use of a hand operated line without rod or reel, to which may be attached not more than three hooks. When fishing for bottom fish, "angling" and "jigging" shall be identical in meaning.

(18) "In the field or in transit" means at any place other than at the ordinary residence of the harvester. An ordinary residence is a residential dwelling where a person normally lives, with associated features such as address, telephone number, utility account, etc. A motor home or camper parked at a campsite or a vessel are not considered to be an ordinary residence.

(19) "Juvenile" means a person under fifteen year of age.

(20) "Lure" means a manufactured article constructed of feathers, hair, fiber, wood, metal, glass, cork, leather, rubber or

plastic which does not use scent or flavoring to attract fish.
"Nonbuoyant lure" means a lure complete with hooks, swivels or other attachments, which does not float in freshwater.

(21) "Night closure" means closed to fishing from one hour after official sunset to one hour before official sunrise.

(22) "Opening day of lowland lake season" means the ~~((last))~~ fourth Saturday in April.

(23) "Possession limit" means the number of daily limits allowed to be retained in the field or in transit.

(24) "Processed" means fish or shellfish which have been processed by heat for human consumption as kippered, smoked, boiled, or canned.

(25) "Steelhead license year limit" means the maximum number of steelhead trout any one angler may retain from April 1st through the following March 31st.

(26) "Selective gear rules" means terminal fishing gear is limited to artificial flies with barbless single hooks or lures with barbless single hooks and bait is prohibited. Up to three hooks may be used. Only knotless nets may be used to land fish. In waters under selective gear rules, fish may be released until the daily limit is retained.

(27) "Slough" means any swamp, marsh, bog, pond, side-channel, or backwater connected to a river by water. Waters called sloughs that are not connected to a river are considered lakes.

(28) "Snagging" means an effort to take fish with a hook and line in a manner that the fish does not take the hook or hooks voluntarily in its mouth.

(29) "Spearing" or "spear fishing" means an effort to take fish or shellfish by impaling the fish or shellfish on a shaft, arrow or other device.

(30) "Stationary gear restriction" means the line and weight and lure or bait must be moving while in the water. The line and weight and lure or bait may not be stationary.

(31) "Steelhead" means sea-run rainbow trout over twenty inches in length.

(32) "Trolling" means a method of fishing from a vessel or floating device that is underway and under power.

(33) "Unmarked salmon" means a salmon with intact adipose and ventral fins.

(34) "Trout" means brown trout, bull trout, cutthroat trout, Dolly Varden, Eastern brook trout, golden trout, grayling, Kokanee (silver trout), lake trout, rainbow trout, tiger trout, and, in WAC 232-28-619, salmon from waters designated as "landlocked salmon rules apply."

(35) "Whitefish gear rules" means terminal fishing gear is restricted to one single hook, maximum hook size three-sixteenths inch point to shank (hook size 14), and bait is allowed. All species: Release all fish except whitefish.

(36) "Wild" when used to describe the difference between a hatchery fish and a nonhatchery fish, except salmon, means a fish with all fins intact.

(37) "Wild" when used to describe a salmon (Chinook, coho, chum, pink or sockeye), means a salmon with an unclipped adipose fin, regardless of whether the fish is ventral fin-clipped. A salmon with

a clipped adipose fin and a healed scar at the site of the clipped fin is not a wild salmon.

(38) "Wild cutthroat release" means it is unlawful to retain any cutthroat trout that does not have a clipped adipose fin and a healed scar at the location of the clipped fin.

(39) "Wild steelhead release" means it is unlawful to retain any steelhead that does not have a clipped adipose or ventral fin and a healed scar at the location of the clipped fin.

AMENDATORY SECTION (Amending Order 08-23, filed 2/13/08, effective 1/1/09)

WAC 220-56-282 Sturgeon--Areas, seasons, limits and unlawful acts. (1) It is unlawful to retain green sturgeon.

(2) It is ~~un~~lawful to retain white sturgeon in Puget Sound and all Puget Sound tributaries from May 15 through June 30.

(3) For all saltwaters excluding Puget Sound and Puget Sound tributaries, it is lawful to fish for white sturgeon the entire year in saltwater, but open in freshwater only concurrent with a salmon or (~~gamefish~~) game fish opening unless otherwise provided.

~~((3))~~ (4) The daily limit is one white sturgeon, with the following size restrictions:

(a) Minimum size 43 inches fork length in the Columbia River and tributaries upstream from The Dalles Dam.

(b) Minimum size 38 inches fork length in all other state waters.

(c) Maximum size 54 inches fork length.

Once the daily limit has been retained, it is lawful to continue to fish for sturgeon in the mainstem of the Columbia River downstream from where the river forms the boundary between Oregon and Washington, provided that all subsequent sturgeon are released immediately.

~~((4))~~ (5) The possession limit is two daily limits of fresh, frozen or processed white sturgeon.

~~((5))~~ (6) There is an annual personal-use limit of five white

sturgeon from April 1 through March 31, regardless of where the sturgeon were taken. After the annual limit of sturgeon has been taken, it is lawful to continue to fish for white sturgeon in the mainstem Columbia River downstream from where the river forms the common boundary between Oregon and Washington, provided that all subsequent sturgeon are released immediately.

~~((6))~~ (7) It is unlawful to fish for sturgeon with terminal gear other than bait and one single barbless hook. It is lawful to use artificial scent with bait when fishing for white sturgeon. Violation of this subsection is an infraction, punishable under RCW 77.15.160. It is unlawful to possess sturgeon taken with gear in violation of the provisions of this section. Possession of sturgeon while using gear in violation of the provisions of this section is a rebuttable presumption that the sturgeon were taken with such gear. Possession of such sturgeon is punishable under RCW 77.15.380 Unlawful recreational fishing in the second degree--Penalty, unless the sturgeon are taken in the amounts or manner to constitute a violation of RCW 77.15.370 Unlawful recreational fishing in the first degree--Penalty.

~~((7))~~ (8) It is unlawful to fish for or possess sturgeon taken for personal use from freshwater, except the Chehalis River, from one hour after official sunset to one hour before official sunrise.

~~((8))~~ (9) It is unlawful to possess in the field sturgeon eggs without having retained the intact carcass of the fish from which the eggs have been removed.

~~((9))~~ (10) It is unlawful to use a gaff or other fish landing aid that penetrates the fish while restraining, handling or landing

a sturgeon.

((~~10~~)) (11) It is unlawful to fail to immediately return to the water any undersize sturgeon.

AMENDATORY SECTION (Amending Order 11-273, filed 10/11/11, effective 11/11/11)

WAC 232-28-619 Washington food fish and game fish--Freshwater exceptions to statewide rules. (1) All freshwater streams and lakes not listed as open for salmon fishing are closed to fishing for salmon.

(2) As used in this section, "lead jig" means a lure consisting of a hook permanently or temporarily attached directly to a lead weight by any method. "Lead weight" means material constructed of lead and applied to a fishing line or lure and designed to help keep the hook, bait, or lure underwater.

(3) Freshwater terminal gear restrictions: In all waters with freshwater terminal gear restrictions, including, but not limited to, selective gear rules, whitefish gear rules, single point barbless hooks required, fly-fishing only, and anti-snagging rules, violation of the gear rules is an infraction, punishable under RCW 77.15.160. It is unlawful to possess fish taken with gear in violation of the freshwater terminal gear restrictions. Possession of fish while using gear in violation of the freshwater terminal gear restrictions is a rebuttable presumption that the fish were taken with such gear. Possession of such fish is punishable under RCW 77.15.380 Unlawful recreational fishing in the second degree, unless the fish are taken in the amounts or manner to constitute a violation of RCW 77.15.370 Unlawful recreational fishing in the first degree.

In the Columbia River between Washington and Oregon, the license of either state is valid. Anglers must comply with the fishing regulations of the state in which they are fishing. This provision does not allow an angler licensed in Oregon to fish on the Washington shore, or in the sloughs or tributaries in Washington except Camas Slough, where the license of either state is valid when fishing from a floating device.

Anglers fishing the Columbia River are restricted to one daily limit, as defined by the laws of the state in which they are fishing, even if they are licensed by both states.

Anglers may not possess in the field salmon or steelhead mutilated so that size, species, or fin clip cannot be determined until the angler has reached their automobile or principal means of land transportation.
