“GREEN SHEET”

Meeting: November 8-9, 2012, Commission Meeting

Agenda # 5 : WAC Overhaul Technical Rule Changes, Round 4 - Rule Briefing

Staff Contact: Mike Cenci, Deputy Chief, Enforcement Program

Presenter(s): Joanna Eide, Administrative Regulations Analyst,
Enforcement Program

Background: A WAC overhaul project is currently underway to update, reorganize, and streamline the department’s administrative code. The WAC overhaul project was presented to the Commission during the February 2012 meeting. Changes to rules for clarity, uniformity, adequacy, and accuracy, as well as the repeal of outdated and unnecessary rules are proposed as part of this project. This agenda item is to brief the Commission and hold a public hearing on the fourth batch of technical rule changes associated with the WAC Overhaul. The proposal amends WAC sections to update, clarify, reorganize, and restructure numerous wildlife, fish, and shellfish rules. The topic areas range from aquaculture, to razor clams, to possession of live wildlife, and hunting seasons. Several references to “department of game” and “department of fisheries” were corrected. The proposal also repeals several outdated and unnecessary WAC sections, and those sections that were incorporated into other sections as part of the restructuring and reorganizing part of this proposal.

Policy issues: The proposal includes technical amendments to clarify rules, and reorganize and restructure the rules in preparation to move the code into a new numbering and organizational structure in 2013. No policy changes were made; the changes in this package are technical in nature.

Public involvement process and outcome: A public hearing will be held in conjunction with the Commission briefing during the November Commission Meeting. WDFW also sent notifications of proposed rule changes to members of the public who expressed interest in being notified of proposed rule changes.

Action requested: None.

Draft motion language: None.

Justification for Commission Action: Rule language is supposed to be efficient, clear, legally adequate, and accurate. The proposed amendments are in accordance with and will promote these goals while avoiding changes to the underlying meaning of the rules. The reorganization of rules and the repeal of outdated rules in this proposal

will promote the clarity and efficiency of WDFW's administrative code.

Communications Plan: This rule proposal is listed on the agency's website on the Current Rule Making Activities page. WDFW sent notifications of proposed rule changes to members of the public who expressed interest in being notified of proposed rule changes. Because of the largely technical nature of the changes in this rule proposal, no extensive formal communications plan was needed.

Title of rule and other identifying information: (Describe Subject) The subject of this proposed rule-making is updating, reorganizing, clarifying, and streamlining several wildlife and fish rules within the department's WACs. WACs from chapters 220-16, 220-20, 220-55, 220-56, 220-74, 220-76, 220-85, 220-90, 220-100, 232-12, 232-13, 232-16, and 232-28 are involved in this rulemaking project. See Attachment A. The title of this project is Technical WAC amendments and repeal, Round 4 (Changes to wildlife rules and other rules) as found on the department's rulemaking activity page.

(Note: This is NOT the effective date)

Purpose of the proposal and its anticipated effects, including any changes in existing rules: This proposed rule-making is to streamline, reorganize, and update rules in accordance with the WAC Overhaul Project currently underway. The Washington Department of Fish and Wildlife's (WDFW's) administrative code is in need of updating and consolidation. The agency's RCWs were combined and updated after the department of fisheries and the department of wildlife consolidated, but a consolidation, clean-up, and streamlining of the administrative codes was never done. These changes are part of a larger effort to reorganize and update the agency's administrative code. Anticipated effects are minimal; this project involves merely rewording, clarifying, and reorganizing rules already in existence. See attachment A for a list of rules amended, new rules proposed, and rules repealed as part of this proposal.

Reasons supporting proposal: WDFW needs these changes to increase efficiency, functionality, and clarity of the rules within WDFW's Administrative Code. The changes promote increases in conservation and availability of resources. The proposal is part of WDFW's WAC Overhaul Project to streamline, update, and reorganize WDFW's Administrative Code.

Statutory authority for adoption: RCW 77.04.012, 77.04.013, 77.04.055, 77.12.045, and 77.12.047.

Statute being implemented: RCW 77.12.045, and 77.12.047.

NEW SECTION

WAC 232-12-063 Live wildlife---Facility, fencing, and marking requirements. (1) Secure facility:

(a) All captive wildlife held under a department issued permit must be held in a secure facility. For the purposes of this rule, a secure facility is an enclosure constructed to prevent danger to the environment or wildlife of the state, including escape of live wildlife specimens in captivity or ingress of resident wildlife ungulates (hoofed animals).

(b) For wildlife listed in WAC 232-12-064(2), the secure facility must comply with the fencing requirements in subsection (2) of this section.

(2) Fencing requirements:

(a) Perimeter fences must be, at a minimum, 8 feet above ground level for their entire length. The bottom 6 feet must be mesh of sufficient size to prevent resident wildlife ungulates (hoofed animals) from entering and captive wildlife from escaping. If the wire used is not a full 8 feet in height, it must be overlapped one row and securely fastened at every other vertical row or woven together with cable. Supplemental wire required to attain a height of 8 feet may be smooth, barbed, or woven wire (at least 12 1/2 gauge) with strands spaced not more than 6 inches apart.

(b) Perimeter fences constructed of high tensile wire must be supported by a post or stay at minimum intervals of 8 feet.

(c) Perimeter fences must be at least 12 1/2 gauge woven wire, 14 1/2 gauge high-tensile woven wire, chain link, nonclimbable woven fence, or other fence approved by the director.

(d) Electric fencing materials may be used on perimeter fences only as a supplement to conventional fencing materials.

(e) All gates in the perimeter fences must be self-closing, equipped with 2 locking devices, and installed only in locations that have been approved by the director. Double gates may be required at points in the perimeter fences subject to frequent vehicle traffic that is not related to activities involving the holding of captive wildlife.

(f) Posts used in the perimeter fences must be:

(i) Wood (pressure treated), 5-inch minimum diameter or an equivalent as approved by the director;

(ii) Spaced no more than 24 feet apart with stays or supports at eight foot intervals between the posts;

(iii) Extended at least 8 feet above ground level; and

(iv) Constructed with corners braced with wood or with an equivalent material as approved by the director.

(g) Fences must be maintained at all times to prevent captive wildlife from escaping or resident wildlife ungulates (hoofed

animals) from entering the enclosure. If animals pass through, under, or over the fence because of any topographic feature or other conditions, the person possessing wildlife must immediately supplement the fence to prevent continued passage.

~~((h) A person may petition the director in writing for a variance from the above fencing requirements for a fence existing prior to February 13, 1993. Any variance petition must be filed no later than May 31, 1993, and must identify all aspects in which the existing fence does not meet the fencing requirements contained herein. With director approval, a person may maintain the existing fence with normal repair. However, any extension or relocation of existing fence must meet the fencing requirements contained herein.))~~

(3) Marking requirements:

(a) All live specimens of wildlife identified in WAC 232-12-064(2) must be individually identified by:

(i) USDA official ear tags or ear tags supplied or approved by the department. Tags must be applied in sequential order; and

(ii) A tattoo with an identifying number that has been recorded with the director. The tattoo must be placed on the left ear of the animal.

(b) Identification assigned to an individual animal may not be transferred to any other animal.

(c) Where allowed, all lawful progeny of wildlife identified in WAC 232-12-064(2) must be tagged and tattooed by December 31st of the year of birth or upon leaving the holding facility, whichever is earlier.

(d) Where allowed, if wildlife identified in WAC 232-12-064(2) is sold or transferred within the state, the tag and tattoo must accompany the animal. The new owner or possessor may not renumber the animal.

(e) Where allowed, live specimens of wildlife identified in WAC 232-12-064(2) must be marked prior to importation.

(f) Wildlife identified in WAC 232-12-064(2) may not be sold or otherwise transferred from the holding facility.

(4) Violation of this section is a misdemeanor punishable under RCW 77.15.750, Unlawful use of a department permit--Penalty.

(11) Escaped wildlife:

(a) Escaped wildlife (~~((will be))~~) is considered a public nuisance. The department or any peace officer may seize, capture, or destroy wildlife that have escaped the possessor's control. The former possessor (~~((shall be))~~) is responsible for costs incurred by the department in recovering, maintaining, or disposing of such animals, as well as any damage to the state's wildlife or habitat.

~~(b) ((Escapes of)) Possessors must report escaped wildlife ((must be reported immediately)) to the department immediately.~~

~~(c) Possessors must report the recapture or death of escaped wildlife ((must be reported immediately)) to the department immediately.~~

~~((12) Secure facility:~~

~~(a) All captive wildlife will be held in a secure facility. For the purposes of this rule, a secure facility is an enclosure so constructed as to prevent danger to the environment or wildlife of the state, including escape of live wildlife specimens in captivity or ingress of resident wildlife ungulates (hoofed animals).~~

~~(b) For wildlife listed in subsection (2) of this section, the secure facility must comply with the fencing requirements in subsection (13) of this section.~~

~~(13) Fencing requirements:~~

~~(a) Perimeter fences must be, at a minimum, eight feet above ground level for their entire length. The bottom six feet must be mesh of sufficient size to prevent resident wildlife ungulates (hoofed animals) from entering and captive wildlife from escaping. Supplemental wire required to attain a height of eight feet may be smooth, barbed, or woven wire (at least 12-1/2 gauge) with strands spaced not more than six inches apart.~~

~~(b) Perimeter fences constructed of high tensile wire must be supported by a post or stay at minimum intervals of eight feet.~~

~~(c) Perimeter fences must be at least 12-1/2 gauge woven wire, 14-1/2 gauge high-tensile woven wire, chain link, nonclimbable woven fence, or other fence approved by the director.~~

~~If the wire used is not a full eight feet in height, it must be overlapped one row and securely fastened at every other vertical row or woven together with cable.~~

~~(d) Electric fencing materials may be used on perimeter fences only as a supplement to conventional fencing materials.~~

~~(e) All gates in the perimeter fences must be self-closing, equipped with two locking devices, and installed only in locations that have been approved by the director. Double gates may be required at points in the perimeter fences subject to frequent vehicle traffic that is not related to activities involving the holding of captive wildlife.~~

~~(f) Posts used in the perimeter fences must be:~~

~~(i) Wood (pressure treated), five-inch minimum diameter or an equivalent as approved by the director;~~

~~(ii) Spaced no more than twenty-four feet apart with stays or supports at eight foot intervals between the posts;~~

~~(iii) Extended at least eight feet above ground level; and~~

~~(iv) Have corners braced with wood or with an equivalent material as approved by the director.~~

~~(g) Fences must be maintained at all times to prevent captive wildlife from escaping or resident wildlife ungulates (hoofed animals) from entering the enclosure. If such animals do pass through, under, or over the fence because of any topographic feature or other conditions, the person possessing wildlife must immediately supplement the fence to prevent continued passage.~~

~~(h) For any fence existing prior to February 13, 1993, a~~

person may petition the director in writing for a variance from the above fencing requirements. Any such petition must be filed no later than May 31, 1993, and must identify all aspects in which the existing fence does not meet the fencing requirements contained herein. On approval of the director, such person may maintain such existing fence with normal repair. However, any extension or relocation of existing fence must meet the fencing requirements contained herein.

~~(14) Marking requirements:~~

~~(a) All live specimens of wildlife identified in subsection (2) of this section must be individually identified by the methods specified below:~~

~~(i) All live specimens of such wildlife shall be marked with USDA official ear tags or with ear tags supplied or approved by the department. Tags shall be applied in sequential order, and~~

~~(ii) All live specimens of such wildlife shall be marked with a tattoo with an identifying number that has been recorded with the director. The tattoo must be placed on the left ear of the animal.~~

~~(b) Identification assigned to an individual animal may not be transferred to any other animal.~~

~~(c) Where allowed, all lawful progeny of wildlife identified in subsection (2) of this section must be tagged and tattooed by December 31 of the year of birth or upon leaving the holding facility, whichever is earlier.~~

~~(d) Where allowed, if wildlife identified in subsection (2) of this section is sold or transferred within the state, the tag and tattoo must accompany the animal. The new owner or possessor shall not renumber the animal.~~

~~(e) Where allowed, live specimens of wildlife identified in subsection (2) of this section shall be marked prior to importation.~~

~~(f) No unmarked wildlife identified in subsection (2) of this section may be sold or otherwise transferred from the holding facility.~~

~~(15)) (12) Testing ((of)) specimens:~~

~~(a) ((Where allowed, prior to entry into the state of Washington, persons importing)) If the director issues a permit to allow any member of the Genus Cervus, ((which is)) identified in subsection (2) of this section, then prior to the animal's entry into Washington state, the person must submit records of genetic tests conducted by a professionally recognized laboratory to identify red deer genetic influence ((+)). Red deer genetic influence is genetic material from any member of any subspecies, race, or species of the elk-red deer-wapiti complex Cervus elaphus not indigenous to the state of Washington((+)). ((Such testing shall be at the possessor's expense.)) Upon examination by department biologists, animals ((which are)) deemed ((by department of fish and wildlife biologists upon examination)) to exhibit ((either)) behavioral (vocalization), morphological (size, rump patch, color), or biochemical indications of such influence (hemoglobin, superoxide dismutase, transferrin and post-transferrin, or others to be developed) may not be imported.~~

(b) A person currently holding any member of the genus *Cervus elaphus* identified in subsection (2) of this section must immediately submit to the director records of genetic tests conducted by a professionally recognized laboratory to identify red deer genetic influence (~~((genetic material from any member of any subspecies, race, or species of the elk-red deer-wapiti complex *Cervus elaphus* not indigenous to the state of Washington))~~), as defined in (a) of this subsection, for each individual cervid (~~(to the director within ninety days of passage of this rule)~~). ~~((Such))~~ Genetic testing (~~((shall))~~) will be at the possessor's expense. Any animals identified as red deer or having nonindigenous genetic influence must be destroyed, removed from the state, or neutered (~~(within one hundred eighty days of passage of this rule)~~) immediately.

(c) The director may require (~~(that specimens)~~) wildlife listed in subsection (2) of this section that are lawfully held in captivity to be tested for brucellosis (*Brucella abortus*), tuberculosis (*Mycobacterium bovis* and *Mycobacterium tuberculosis*), meningeal worm (*Paralophostrongylus tenuis*), and muscle worm (*Elaphostrongylus cervis*) in accordance with the procedures specified in department of agriculture WAC 16-54-180 (~~(as now or hereafter amended, and/or)~~). The director may also require testing for other diseases or parasites determined to pose a risk to wildlife. ~~((The))~~ Results of (~~((such))~~) those tests (~~((shall))~~) must be filed with the director as required.

~~((16))~~ **(13) Reporting:**

(a) A person holding wildlife listed in subsection (2) of this section in captivity (~~((shall))~~) must submit a completed report no later than March 30, 1993, and then no later than January 31 of each year, or as otherwise required by the director, on a form provided by the department.

(b) Persons possessing wildlife listed in subsection (2) of this section must notify the director within (~~((ten))~~) 10 days of any change of such persons' address and/or location of the holding facility.

~~((17))~~ **(14) Inspection:**

~~((a))~~ All holding facilities for captive wildlife located in the state are subject to inspection, conducted at a reasonable time, for compliance with the provisions of this section.

~~((b) Such inspections shall be conducted at reasonable times.~~

~~((18))~~ **(15) Notification and disposition of diseased animals:**

(a) Any person who has reason to believe that wildlife being held pursuant to this rule have contracted or (~~((have))~~) been exposed to a dangerous or communicable disease or parasite (~~((shall))~~) must notify the department immediately.

(b) Upon (~~((having))~~) reason to believe that wildlife held pursuant to this rule have contracted or been exposed to (~~((or contracted))~~) a dangerous or contagious disease or parasite, the director may order inspection of such animals by a licensed, accredited veterinarian, certified fish pathologist, or inspection agent. Inspection (~~((shall))~~) will be at (~~((the expense of))~~) the (~~((possessor))~~) possessor's expense.

(c) The director (~~(shall)~~) will determine when destruction of wildlife(~~(7)~~) or quarantine, disinfection, or sterilization of facilities is required at any facility holding wildlife pursuant to this rule. If the director determines that destruction of wildlife(~~(7)~~) or quarantine, disinfection, or sterilization of facilities is required, he or she will issue a written order (~~(shall be issued)~~) to the possessor describing the procedure to be followed and the time period for carrying out such actions. (~~(Such activities shall)~~) The destruction of wildlife or quarantine, disinfection, or sterilization of facilities will be at (~~(the expense of)~~) the (~~(possessor)~~) possessor's expense.
