ACKNOWLEDGEMENTS

Many Department of Fish and Wildlife biologists and program staff contributed to the compilation and editing of this report. Thanks go to the staff in Licensing, Information Systems, Support Services Unit, and Fish Management. Special thanks are due to Dan Ayres, Mark Baltzell, Wendy Beeghley, Lynette Bounds, David Bramwell, Joe Hymer, Olaf Langness, Bob Leland, Glen Mendel, Mark O'Toole, Maria Parnel, Euna Parse, Steve Thiesfeld, Camille Speck, and Karla Weiss.

INTRODUCTION

The Washington State Sport Catch Report was first published in 1967. The report originally provided salmon catch estimates, which were and still are based on data from catch record cards (punch cards). In 1975, marine fish sport harvest estimates were added to the report, followed by shellfish estimates in 1976. Marine fish and intertidal shellfish sport harvest estimates are based on field and creel surveys. In 1994, with the merger of the departments of Fisheries and Wildlife, steelhead sport harvest estimates were added to the report. Now, catch record card data are collected for salmon, sturgeon, steelhead, Dungeness crab and halibut. The card data is supplemented with field or creel survey data or telephone surveys where available to improve recreational harvest estimate accuracy. The sport harvest estimates for salmon, steelhead, sturgeon, marine fish and shellfish are produced at varying times of each year. For this reason, coupled with an increase in the number of catch record cards issued, budget, and staffing constraints, the 2011 edition of the Washington State Sport Catch Report is being published in December 2014.

The 2011 sport estimates reflect harvest from April 1, 2011, through March 31, 2012. Historically, salmon, sturgeon, halibut, marine fish and shellfish estimates were made on a calendar year basis from January 1 through December 31. Steelhead estimates were summarized from May 1 through the next April 30 to better capture the results of steelhead “run years”. Effective January 1, 1999, the sport license system adopted an April 1 to March 31 license year for all species. To adjust to the new reporting time frames, the 1999 sport report included 15 months of salmon and sturgeon catch and 11 months of steelhead catch (May 1, 1999 – March 31, 2000). When comparing past years’ sport harvest estimate tables, please note the changes in the license structure and reporting year as described above.

SPORT LICENSES AND CATCH RECORD CARDS

In 2011, the following licenses and catch record cards were required to fish in Washington:

- Saltwater license: Required for saltwater fishing, for all anglers aged sixteen and over. Available for residents, resident seniors (70 and older), and non-residents. Catch record cards required for salmon, steelhead, sturgeon and halibut, for anglers of all ages.
- Freshwater license: Required for freshwater fishing, for all anglers aged sixteen and over. Available for residents, resident seniors (70 and older), and non-residents. Catch record cards required for salmon, steelhead and sturgeon, for anglers of all ages.
- Shellfish/seaweed license: Required for harvesters aged sixteen and over. Available for residents, resident seniors (70 and older), and non-residents. Allows the holder to harvest clams, mussels, oysters, shrimp, crab, squid, other shellfish, and seaweed. In addition, a Puget Sound crab endorsement and catch record card was required to harvest Dungeness crab in Marine Areas 5-13.
- Combination license: Allows anglers to fish in both saltwater and freshwater and to harvest shellfish and seaweed. Available for both residents and non-residents aged fifteen and over.

Fish catch record cards were required for salmon, steelhead, sturgeon and halibut. Each species group could be issued as a separate card, or included together on one card. Separate catch record cards were required for recording Dungeness crab in Puget Sound. Separate crab cards were required for the summer and fall/winter seasons.

In 2001 WDFW implemented the Washington Interactive Licensing Data (WILD) system to electronically capture recreational license issuance information at the point of sale. The catch record card remained the same paper document distributed by sport license vendors, but demographic data about persons receiving the cards became available almost immediately.

Table 1 lists license sales for the license year which ran from April 1, 2011 through March 31, 2012. Table 2 provides counts for the numbers of fish and crab catch cards issued going back to 1971. Table 3 shows the return rate, expansion factor, and non-response bias correction factors for the 2011-12 cards.

METHODS

Catch record card returns are used to estimate sport salmon catch in marine and freshwater areas. For some areas, the catch cards numbers are replaced with estimates based on creel surveys. In marine areas, creel estimates were used in Areas 1-4 (not including Willapa bay or Grays Harbor), and for many of the Puget Sound fisheries including the summer months in Area 5, 9, 10 and 11, and winter blackmouth fisheries in Area 7, 8-1, 8-2, 9, 10, and 11.

The sport catch record card is used to produce the annual sport harvest estimates for salmon, steelhead, sturgeon, and halibut. Anglers holding in-sample cards are sent reminders to return their CRC's. Harvest summed from returned in-sample cards is expanded to account for the un-sampled cards (75%) and unreturned cards. A bias adjustment factor is applied in some areas and species to account for successful anglers returning cards at a higher rate than unsuccessful anglers. Creel survey data are substituted for CRC data when available. The preliminary sport harvest estimates are sent to WDFW and Tribal biologists statewide for review. After review comments are compiled and investigated, final sport harvest estimates are prepared and distributed.

The methods used produce estimates of sport harvest, which have some level of uncertainty. This uncertainty, or variance, is estimated and expressed with confidence levels, which are not provided in this report. These variance estimates are available upon request.

OCEAN CATCH DATA

Sport catch data from coastal areas 1 – 4 were reported using “port sampling” (creel survey) catch estimates. Such estimates were derived by monitoring daily landings at four coastal ports: Ilwaco, Westport, La Push, and Neah Bay. Catch is reported in the area where the fish was caught and not the area where it was landed.

STATISTICAL MONTHS AND STATISTICAL WEEKS

Some catch data (i.e. salmon and bottomfish) are reported using statistical months or statistical weeks. Statistical weeks (defined as Monday-Sunday) are consecutively numbered weeks beginning on January 1 and continuing through week 53 or 54, ending on December 31. The first and last weeks of any year usually contain less than 7 days. Statistical months are made up of a set number of statistical weeks, which approximate calendar months but do not coincide with calendar month start and end dates. For example, in 2011, the statistical month of January begins January 1 and ends January 30 and the statistical month of February starts on January 31 and ends February 27. Due to the differences between calendar and statistical months, some catch may be reported during what appears to be a closed period.

SALMON

Annual sport salmon catch estimates for 1971 through 2011 are shown in Table 4. Between April 1, 2011, and March 31, 2012 a total of 318,894 salmon were caught in marine areas, and 572,283 salmon were caught in freshwater. The marine totals by species, as shown in Table 5, are: 60,902 chinook; 101,573 coho; 2,051 chum; 153,602 pink; 293 sockeye; and 472 jacks (all species combined). Freshwater species breakdowns are: 121,589 chinook; 91,670 coho; 14,434 chum; 316,051 pink; 12,307 sockeye; 31,931 jacks (all species combined).

Catch record card returns are used to estimate sport salmon catch in marine and freshwater areas. For some areas, the catch cards numbers are replaced with estimates based on creel surveys. In marine areas, creel estimates were used in Areas 1-4 (not including Willapa bay or Grays Harbor), and for many of the Puget Sound fisheries including the summer months in Area 5, 9, 10 and 11, and winter blackmouth fisheries in Area 7, 8-1, 8-2, 9, 10, and 11.

STURGEON

On the new combined sport catch record card, sturgeon fishers were required to record their catch statewide. The total sport harvest for 2011, based on creel surveys and catch record card returns, was 6,866 fish. Of this total, 6,235 white sturgeon came from the Columbia River and Snake River systems combined (Table 27). Catch from coastal rivers (including Willapa Bay and Grays Harbor) totaled 262 white sturgeon. Puget Sound rivers and marine areas produced 203 white sturgeon. For monthly catch information see Table 27.

STEELHEAD

Harvest estimates for sport-caught summer and winter steelhead are based on catch record card returns. Steelhead caught during the months of May through October are considered “summer-runs,” designated S. Steelhead caught from November through April are considered “winter-runs,” designated W, with the exception of steelhead caught above Bonneville Dam on the Columbia River, where all steelhead are considered “summer-runs,” because of run and spawn timing.

Table 31 presents steelhead sport harvest estimates for the 2011-2012 season geographically by stream and river system. Monthly estimate totals are given for marked and unmarked steelhead.

MARINE FISH

Marine fish are those species of fish which live their entire lives in salt water. There are four general groups of marine fish for management purposes: 1) bottomfish, which are species such as rockfish, lingcod and most species of sole and flounder; 2) forage fish, which are small, schooling fish such as herring and smelt; 3) tunas and mackerels; 4) Pacific halibut.

The recreational catch of bottomfish and halibut in ocean waters (Catch Areas 1-4) is estimated from marine surveys (Table 35 and 36). The estimates are made for each of the four main coastal fishing areas: Ilwaco, Westport, La Push and Neah Bay.

The Puget Sound (Catch Areas 5-13) catch of bottomfish, excluding halibut, is estimated using a combination of two surveys: a creel survey of anglers to determine the catch rate and species composition and a phone survey of licensed anglers to determine total fishing effort. These estimates are shown in Table 37. The recreational catch of forage fish is not routinely monitored and no harvest estimate is available.

SHELLFISH

Razor clam harvest on the coastal beaches is summarized in Table 38. During the fall of 2011 and the spring of 2012 187,356 digging trips resulted in a harvest of 2,436,288 clams, for an average of 13 clams per trip.

Puget Sound recreational clam and oyster harvest estimates are shown in Table 39. Harvest totals for Manila and native littleneck clams, butter clams, cockles, softshell clams, horse clams, geoducks and oysters are shown for public access beaches. Estimates show 108,926 sport harvester trips gathered 383,492 total pounds of clams and 750,902 oysters in 2011 on the monitored beaches.

The Hood Canal sport shrimp fishery harvest is reported in Table 40. A total of 81,454 pounds of shrimp were caught during the six days of the season. Puget Sound shrimpers caught 38,172 pounds of shrimp between May and September. The sport crab fishery in the Puget Sound areas is summarized in Table 42. Crabbers harvested an estimated 2,578,863 pounds of Dungeness crab.

SPORT LICENSES

Table 1. Number and Value of Sport Fishing Licenses Sold in Washington.

| April 1, 2011 - March 31, 2012 - License Year | | | |
|---|---------|-------------|------------------------|
| Type of License | Price | Number Sold | Value |
| Saltwater | | | |
| Resident | \$22.20 | 49,651 | \$1,139,527.20 |
| Non-Resident | \$45.80 | 3,059 | \$139,173.60 |

Salmon

MAP OF SALMON CATCH RECORD CARD AREAS

MARINE WATERS ONLY

| | | |
|------------|-----------------------------------|---|
| 1 | ILWACO | West of the Buoy 10 line at the Columbia River mouth, north to Leadbetter Point. |
| 2 | WESTPORT-OCEAN SHORES | From Leadbetter Point north to the Queets River, excluding Willapa Bay and Grays Harbor. |
| 2-1 | WILLAPA BAY | East of a line from Leadbetter Point to Cape Shoalwater. |
| 2-2 | GRAYS HARBOR | East of a line from the tip of the North Jetty to exposed end of the South Jetty. |
| 3 | LA PUSH | From the Queets River north to Cape Alava. |
| 4 | NEAH BAY | From Cape Alava north and inside Juan de Fuca Strait to the Sekiu River. |
| 5 | SEKIU AND PILLAR POINT | From mouth of the Sekiu River east to Low Point, mouth of the Lyre River. |
| 6 | EAST JUAN DE FUCA STRAIT | From Low Point east to the Partridge Point - Point Wilson line north to the line from Trial Island (near Victoria B.C.) - Vessel Traffic Separation Buoy "R" - Smith Island to the Lawson Reef Buoy to Northwest Island to the Initiative 77 marker on Fidalgo Island. |
| 7 | SAN JUAN ISLANDS | All marine waters north of the Trial Island line described under Area 6 to the United States-Canada boundary. |
| 8-1 | DECEPTION PASS, SKAGIT BAY | From West Point to Reservation Head eastward through Deception Pass, including all waters of Swinomish Slough and Skagit Bay, and the portion of Saratoga Passage north and west of a line from East Point Light to light on Camano Island (Saratoga Pass Light #4FI Red 4 Sec.). |
| 8-2 | PORTS SUSAN AND GARDNER | East of East Point Light-Camano Island Light line (described in 8-1 above) and north of the Possession Point-Shipwreck line (described in 9 below). |
| 9 | ADMIRALTY INLET | All waters inside and south of the Partridge Point - Point Wilson line, south and west of a line from Possession Point 110° true to shipwreck, north of the Hood Canal Bridge, and north of the Apple Cove Point-Edwards Point line. |
| 10 | SEATTLE-BREMERTON AREA | South from the Apple Cove Point-Edwards Point line to a line projected true east- west through the north tip of Vashon Island. |
| 11 | TACOMA-VASHON ISLAND | South from a line projected true east west through the north tip of Vashon Island to the Tacoma Narrows Bridge. |
| 12 | HOOD CANAL | All waters south of the Hood Canal Bridge. |
| 13 | SOUTH PUGET SOUND | All waters south of Tacoma Narrows Bridge. |

FRESHWATER AREAS

RIVERS OR STREAMS OR LAKES - Name of river, stream or lake, except for Buoy 10

BUOY 10 (1A)

From Buoy 10 Line to Rocky Point-Tongue Point Line

Table 4. Annual Sport Salmon Catch

| Year | Total | Fresh-water | Un-known | Area 1 | Area 1A | Area 2 | Area 2-1 | Area 2-2 | Area 3 | Area 4 | Area 5 | Area 6 | Area 7 | Area 8 | Area 8-1 | Area 8-2 | Area 9 | Area 10 | Area 11 | Area 12 | Area 13 |
|------|-----------|-------------|----------|---------|---------|---------|----------|----------|--------|--------|---------|---------|--------|--------|----------|----------|---------|---------|---------|---------|---------|
| 1971 | 1,344,818 | 145,904 | | 342,928 | | 446,738 | | | 39,682 | 87,184 | 71,947 | 39,573 | 28,355 | 5,189 | | | 54,920 | 35,225 | 27,332 | 19,841 | |

| 2011 | 906,876 | 572,283 | 15,699 | 26,948 | | 34,069 | 6,314 | 3,327 | 5,558 | 13,024 | 62,003 | 20,257 | 19,305 | | 12,935 | 23,979 | 35,631 | 23,810 | 22,540 | 5,738 | 3,456 |

Note: In 1976, several area boundary lines were changed resulting in thirteen catch areas instead of twelve. The changes were mostly reflected in catch Areas 8, 9, 10 and new Area 13. In 1989, catch Area 8 was subdivided into Areas 8.1 and 8.2 and catch Area 2 was subdivided into Areas 2, 2-1 and 2-2. For comparative purposes, the catch for Areas 8-1 and 8-2 are totaled and entered under Area 8 until 1990. Beginning in 1991, Areas 8-1 and 8-2, are reported separately. Similarly, the catch in Areas 2, 2-1 and 2-2 are included in the total catch for Area 2 until 1990. Beginning in 1991, they are reported separately. The total catch for Area 1 and Area 1A is included in the total catch for Area 1 until 1981. Starting in 1982, they are reported separately. Beginning in 2002, Area 1A catch is included in the freshwater total.

Note: Prior to 1999, sport salmon estimates were based on calendar years. In 1999, the sport estimates cover January 1, 1999 - March 31, 2000. Starting in 2000, sport salmon estimates are based on the fishing license year which runs from April 1 to March 31.

Table 5. Total 2011-2012 Sport Salmon Catch

| Marine Area | Chinook | Coho | Chum | Pink | Sockeye | Jacks | Total Salmon | Marine Angler Trips | Salmon per Trip |
|--|----------------|----------------|---------------|----------------|---------------|---------------|----------------|---------------------|-----------------|
